

AIRTA SYSTEMS INVESTOR
PITCH DECK 2026

AI Risk Testing Agentic Systems

The Problem

EU law now regulates AI products as physical products, mandating safety testing, product liability, and compliance by Q4 2026.

Many EU Financial Services firms are piecing together compliance across multiple vendors while underestimating the **six-month timeline** required to achieve market readiness.

Many UK-based firms remain inactive while waiting for **FCA guidance**, increasing regulatory exposure.

If an AI product provides misleading advice or unsafe outcomes, the **FCA will cite a breach of Consumer Duty**.

Vendors operating in Europe will require **AI compliance equivalent to GDPR-level expectations**.

The Solution

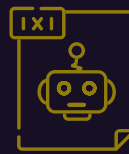

1. CONSOLIDATED AI PRODUCT SAFETY

AIRTA Systems streamlines the full AI compliance lifecycle:

- Risk assessment
- AI product testing
- Compliance Documentation
- Post-market monitoring

Delivering a **turnkey compliance platform** supported by ISITC Europe, our Independent regulatory validation partner

2. AGENTIC TESTING RULES ENGINE

Dynamic testing across leading frameworks:

- EU AI Act and FRIA
- Product Liability Directive
- OECD AI Principles
- NIST AI RMF
- OWASP and MITRE ATT&CK

Using a **proprietary testing rubric** tailored to the AI application.

3. COMPLIANCE IS THE PRODUCT

Every test, remediation action, and report is recorded in a comprehensive evidence package enabling:

- Regulatory defence
- Product safety verification
- CE marking readiness.

The **Gold Standard** for AI Product Safety

1. COMPLIANCE-LED
TESTING SUITE FOR AI
SYSTEMS

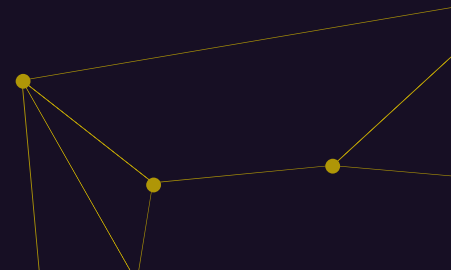

2. AI COMPONENT
DIAGNOSTICS
ENABLING ADAPTIVE
TESTING

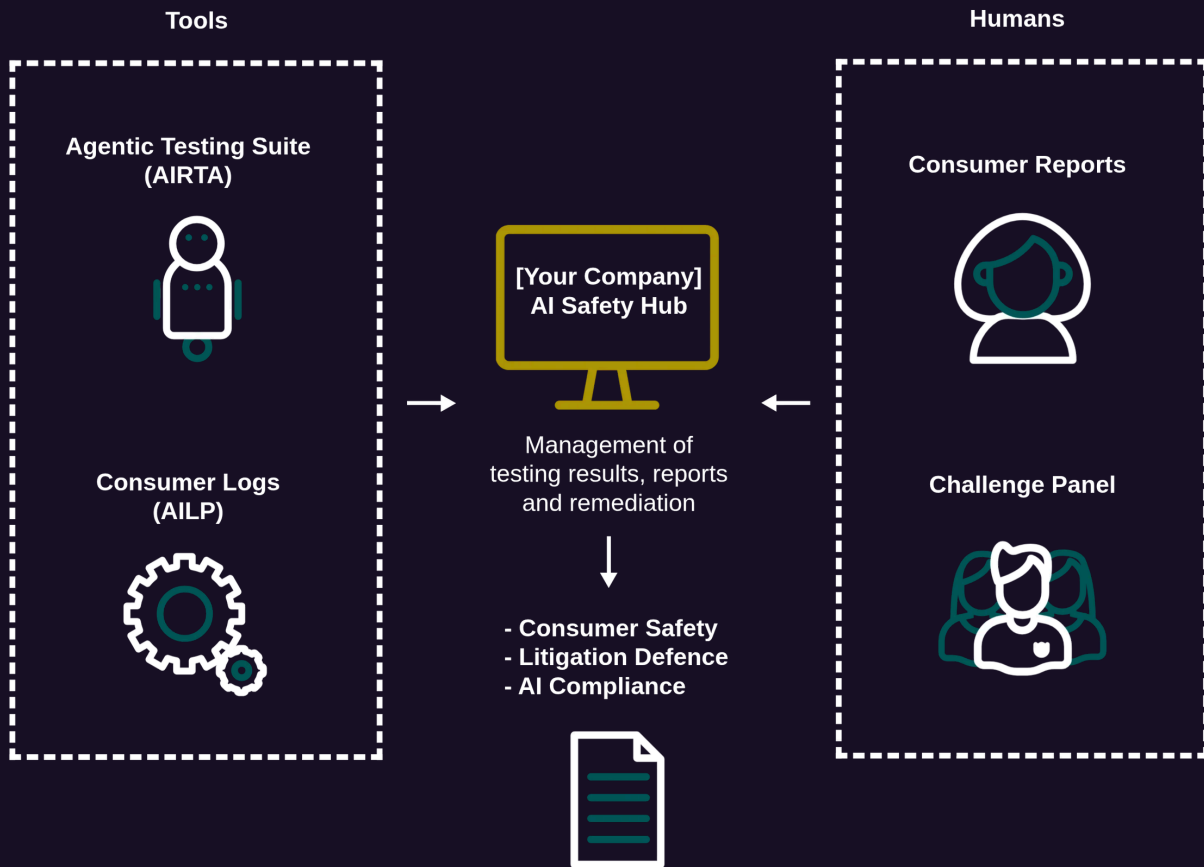

3. EVIDENCE PACKAGED
AND READY FOR AUDIT.
CONTINUOUS POST-
MARKET MONITORING

4. AI PRODUCT SAFETY
CERTIFICATION UP TO
CE MARKING

Our Process

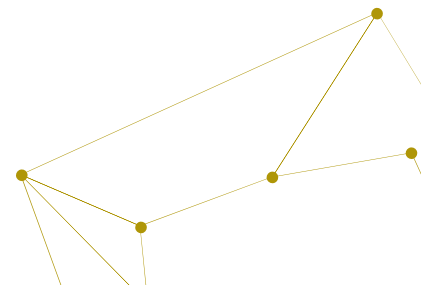

- Airta Systems is the enabler for AI market access, building evidence packages to prove product safety and compliance.

- We protect consumers by **testing, validating and continuously monitoring AI systems.**

- We provide **post-market monitoring** through expert challenge panels, consumer reports and log analysis.

Pre and post market testing **evidence is natively integrated** in to compliance documentation.

- Supported by **ISITC Europe**, our Independent regulatory validation partner.

Market Opportunity

EU AI Act and Product Liability Directive require:

- Safety testing
- CE marking
- Post-market monitoring

Mandatory by August 2026.

TAM

All AI providers selling into Europe
→ £2B+ addressable market by 2028

SAM

High-risk AI sectors (FS, healthcare, automotive)
→ £600M–£800M market

SOM

Early-mover platform targeting FS AI manufacturers
→ £80M–£120M obtainable market within 3-5 years

Source: Precedence Research 2025.

Product Definition

AIRTA Systems accelerates transformation from non-compliant AI to legally approved, revenue-ready products in six months.

Platform Capabilities:

Risk assessment

- Agentic testing - *Appendix C*
- Compliance documentation - *Appendix B*
- Post market monitoring - *Appendix D*

Outputs

- Audit-ready evidence package
- CE marking readiness.

Strategic Advantage

Backed by ISITC Europe, our Independent regulatory validation partner.

The Gold Standard in AI Product Safety

AIRTA Systems uniquely combines:

- Agentic testing engine
- Proprietary compliance rubric
- Consumer reporting
- Post-market monitoring including challenge panels and log analysis and reporting
- ISITC Europe CIC accreditation
- Full legal evidence package.

ISITC Europe CIC, is a not-for-profit industry body promoting education, innovation and collaboration throughout the global Capital Markets.

Competitive Landscape

Player	Focus	Strength	AIRTA Systems Advantage
Credo AI	Governance	Enterprise reach	Full product safety
Holistic AI	Risk testing	EU presence	Post-market monitoring
AuditOne	AI Act checker	Free assessment	Full compliance pipeline
Centraleyes	GRC	Broad compliance	AI liability expertise

Business Model

Annual Enterprise subscription per AI product.

Enterprise SaaS subscription

Platform access \ Unlimited testing.
Usage-based certification
Per-AI-system audit.
Premium certification
ISITC-accredited CE marking packages.
Ongoing monitoring.

Growth Strategy

Land-and-expand.

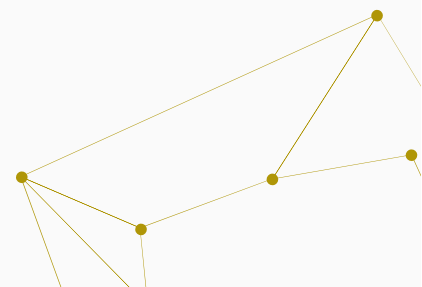

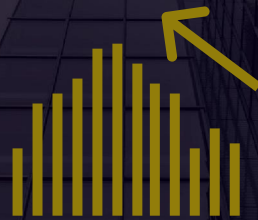

Customers begin with **one AI product**,
then expand across **entire**
portfolios.

Typical deal size

£150k – £500k ARR
per enterprise
customer.

Gross margins: 75%+.

Go-to-Market Strategy

Direct Enterprise sales targeting AI manufacturers selling into Europe.

Strategic Partnerships

- Cloud providers
- Law firms
- Consultancies
- GRC platforms (API)

Timeline

WHO NEEDS AI PRODUCT SAFETY?

An ISITC Europe/Enbounty White Paper

Abstract

Deployers of AI systems and developers of AI applications who intend to conduct business within the EU are now classed as manufacturers of products, with all the associated liability for consumer protection

Traction and Team

Regulatory Partner

- ISITC Europe, is our Independent regulatory validation partner
- Beta pilots underway with EU and UK Financial Services AI providers.
- Early LOIs secured.

Core Team
